

Miles Smith
CNL

Miles Smith is a Vice President of Atkins Nuclear Secured and is currently serving as Director of Waste Management at Whiteshell Laboratories in Canada. In this capacity he has responsibility for all waste management and legacy waste retrieval operations for the Whiteshell Closure Project. This includes the safe retrieval of spent nuclear fuel and buried intermediate level waste and low-level wastes as well as the characterization, packaging, and transportation of all newly generated wastes from the decommissioning of the Whiteshell site.

Over the last 25 years, Miles has had responsibilities for waste management and decommissioning at government and commercial cleanup sites throughout the US. He came to Whiteshell from Los Alamos, NM where he served as Vice President of Southwest Operations for Atkins. Miles is also distinguished combat veteran of the US Army.

Miles holds a BSc in Physics from the University of Oklahoma and a MSc in Health Physics from Texas A&M University.
