

Karine Glenn

Director, Wastes and Decommissioning Division, Canadian Nuclear Safety Commission

Karine is responsible for the regulatory oversight of Canada's radioactive waste management facilities (including deep geological repositories), as well as for providing expertise for all nuclear facilities and activities in the areas of waste management and decommissioning. She is the vice-chair of the CSA technical committees on radioactive waste and decommissioning and sits on the Bureau of the Nuclear Energy Agency's Radioactive Waste Management Committee Regulators' Forum.

With over 20 years of experience in the nuclear field in industry and with the regulator, Karine has also held various roles in the areas of transportation and packaging and internal quality management.

Degrees Earned: (BEng) Building Engineering (Concordia University), P.Eng, Ing.
