

Mahrez Ben Belfadhel
NWMO

Dr. Mahrez Ben Belfadhel is the Vice President of Site Selection at the NWMO. He has been with the NWMO for 12 years, as a leader in both technical assessment and community engagement. Dr. Ben Belfadhel has 30 years of academic, regulatory and industrial experience in areas related to geotechnical engineering and radioactive waste management. Prior to joining the NWMO, he was with the Canadian Nuclear Safety Commission where he was involved in safety assessment and licensing for radioactive waste management facilities across Canada, including uranium mining and milling waste facilities. He has a Bachelor's degree in Civil Engineering from École Polytechnique of Algiers, and a Master's degree and PhD in Geotechnical Engineering from the Université de Sherbrooke, Québec. He is also a registered Professional Engineer.
