

Meggan Vickerd
CNL

Ms. Vickerd is the Director of the Near Surface Disposal Facility Project at Canadian Nuclear Laboratories (CNL). After an initial career in the oil and gas sector, she has been in the Canadian nuclear decommissioning and waste management industry for over a decade. Work at CNL has included a number of challenging projects in environmental remediation, a facility authority role for Canada's shutdown prototype power reactors and a supporting role for the proposed in-situ decommission of the Nuclear Power Demonstration facility. More recently Ms. Vickerd is currently part of the CNL team working on the environmental assessment and licencing proposal for the Near Surface Disposal Facility.

Ms. Vickerd holds a B.Sc. in Physics, a M.Sc. in Hazardous Waste Management and is a registered Environmental Professional.
