

Paul Dinner

Independent Consultant and Technical Lead:
COG Decommissioning and Long Term Waste Management (D<WM)
Strategic R&D Project

Paul is a Professional Engineer whose earliest nuclear memories are of Pickering “B” design. Since then he has led teams in design, safety assessment, aging management and decommissioning planning.

From 2007-2012, while at the IAEA Directorate of Nuclear Energy, he founded the International Decommissioning Network (IDN), and its accompanying on-line forum CONNECT, dedicated to the sharing of experience in waste and decommissioning, and led Peer Reviews and Technical Missions to advise Member States on Waste and Decommissioning good-practice.

Prior to this, Paul worked for Ontario Power Generation’s Nuclear Materials Management Department, serving first as Manager of System Design and Safety Assessment and subsequently as Design Authority and Manager of Engineering.

Degrees Earned:

Paul holds a BSc (Hons) in Applied Mathematics, an MSc in Physics, and an MEng in Chemical Engineering.
