

Steve Plante

Manager, Technical Support, Hydro-Québec Gentilly-2 Facilities

Steve Plante is manager of the Technical Support group at Gentilly-2 Facilities. His team is responsible for the preparation and execution of the decommissioning activities started in 2013. He is involved in the Calandria Segmentation Study and the Defective Fuel Encapsulation Project.

Steve joined Hydro-Québec - Gentilly-2 NPP in 1991. He started as an Engineer with the Modification Engineering Group and became System Engineer for nuclear systems. He participated in the preparation of the Gentilly-2 refurbishment project and moved to management with the decommissioning organization.

Degrees Earned:

Bachelor of Engineering Electrical (University of Sherbrooke)
